Electrochem Announces Record Second Quarter

CLARENCE, NY., August 10, 2005 -- Electrochem Commercial Power, a leading manufacturer of lithium battery packs and cells used in extreme environments, and a division of Greatbatch Ltd. (NYSE:GB), announced today a 30% increase in cumulative sales revenue during the second quarter ending June 30, 2005, compared to the same quarter in the prior year. This record second quarter comes on the heels of a revenue record established during the first quarter ending March 31, 2005. This strong increase resulted in the second quarter being the highest revenue-generating quarter since the division was established in 1979.

“During the second quarter, the Electrochem team continued to focus on building strong relationships with customers by understanding and anticipating their needs,” said Susan Bratton, Vice President, Commercial Power, Greatbatch Ltd. “The outstanding revenue growth achieved in the second quarter is further evidence that Electrochem goals can be achieved by placing the focus on helping our customers achieve their goals”

The revenue growth during the second quarter resulted from a rising demand for Electrochem lithium cells among customers in various industries. The increased demand stemmed from both domestic and international customer operations.

About Electrochem Commercial Power

Electrochem, a division of Greatbatch Ltd., is a world leader in the design and manufacture of lithium batteries and packs. For over 25 years, Electrochem has been committed to providing high-performance lithium cells and battery packs for demanding applications such as oil and gas exploration, pipeline inspection, military, telematics, oceanography and seismic surveying. Electrochem manufactures a wide range of lithium battery types, sizes and chemistries. Electrochem products are sold worldwide through Original Equipment Manufacturers and distributors.
