### **Electrochem Announces Strong Third Quarter Sales Results**

*11% percent year-over-year growth in Q3 revenue*

CLARENCE, NY., November 10, 2005 -- Electrochem Commercial Power, a leading manufacturer of lithium battery packs and cells used in extreme environments, and a division of Greatbatch Ltd. (NYSE:GB), announced today an 11 percent increase in cumulative sales revenue during the third quarter ending September 30, 2005, compared to the same quarter in the prior year. This strong sales result comes on the heels of a revenue record established during the first quarter ending March 31, 2005 and second quarter ending June 30, 2005.

“We’re very pleased to report 11 percent year-over-year growth in Q3 revenue,” said Susan Bratton, Vice President, Commercial Power, Greatbatch Ltd. “This is the direct result of our focus on total quality and customer service.”

Customers around the globe have expressed added interest in the exceptional safety record of Electrochem Lithium cells and battery packs. The success and wide use of lithium batteries is partially due to the fact that they contain more energy per unit weight than conventional batteries. The same properties which result in a high energy density also contribute to potential hazards. Special safety features have been incorporated into the design and manufacture of Electrochem batteries to help ensure user safety.

“For over twenty five years, Electrochem Lithium cells have been subjected to some of the most extreme environments around the world,” says Robert Yetman, Director of Quality at Electrochem. “Electrochem cells have demonstrated an excellent safety record even when used in harsh conditions.”

**About Electrochem Commercial Power**

Electrochem, a division of Greatbatch Ltd., is a world leader in the design and manufacture of lithium cells and battery packs. For over 25 years, Electrochem has been committed to providing high-performance lithium batteries for demanding applications such as oil and gas exploration, pipeline inspection, military, telematics, oceanography and seismic surveying. Electrochem manufactures a wide range of lithium battery types, sizes and chemistries. Electrochem products are sold worldwide through Original Equipment Manufacturers (OEMs) and distributors.
